Extraction Forceps

All Nordent forceps are manufactured of a special surgical stainless steel. Most of the forceps are electropolished to a “mirror finish” for maximum corrosion resistance. Selected patterns feature a smooth, Handform style handle in a “satin finish” that is passivated to achieve the same corrosion resistance as the predominant “mirror finish” forceps. All Forceps are the American pattern style unless noted otherwise as “English Pattern”. The English Pattern forceps all have visible pins or screws in the hinge area whereas the American patterns all feature hinges that are completely polished out and smooth so that no pin is visible.
